BIOGRAPHICAL SKETCH

Junior Assistant Professor (RTD-A) at the University of Bologna since 2024, working at the intersection of robotics and machine learning. Its research focuses on the perception and manipulation of deformable objects, aiming to advance the capabilities of robotic systems in handling complex objects. Its primary research interests include computer vision and tactile sensing, which involve developing algorithms to enhance a robot's understanding of target objects and their environment; robotic manipulation, particularly addressing tasks such as grasping, sliding, and motion planning; deformable object modeling, to predict and control their behavior; and deep learning for physical systems, leveraging neural network approximations of dynamical systems to facilitate robotic tasks.
